

eHealth Network

Guideline on

Patient Summary

RELEASE NOTES (Release 3.4, November 2024)

The eHealth Network guidelines on Patient Summary are one fine example on how the eHealth Network interoperability efforts shape the way how health data exchange takes place around EU. This is the case of cross-border exchange of patient summaries (in MyHealth@EU) as well as other projects at European or national level that leverage working solutions on top of these guidelines.

Release 3.4 includes minor updates carried out by eHealth Network Consistency between eHealth Network Guidelines taskforce. The taskforce was assigned the task of reviewing all existing eHealth Network Guidelines to ensure consistency in content, the textual changes were agreed to be made. No revisions were made on the use cases in the Guidelines, or the use cases present in the European Health Data Space Regulation. This work could be done in a future iteration.
